
SAM EDWARD CUTLER

CONTACT INFORMATION	CLIC 312G Tufts University Dept. of Physics and Astronomy 574 Boston Avenue Medford, MA 02155 USA	<i>Personal E-mail:</i> sam.cutler@cox.net <i>Institutional E-mail:</i> sam.cutler@tufts.edu <i>Website:</i> samecutler.github.io <i>Github:</i> github.com/samecutler <i>ORCID:</i> 0000-0002-7031-2865
---------------------	---	--

RESEARCH INTERESTS	Observational Galaxy Formation and Evolution: quenching, spatially-resolved populations, galaxy morphology, space-based data, photometric catalogs.
--------------------	--

EDUCATION	Ph.D. in Astronomy, University of Massachusetts Amherst (August 2025) Thesis: <i>Investigating the Origin of Low-Mass Quiescent Galaxies</i> Ph.D. Advisor: Katherine E. Whitaker M.S. in Astronomy, University of Massachusetts Amherst (September 2023) B.S. in Physics & Mathematics, University of Connecticut (May 2019) <i>Summa cum Laude</i> , Honors Scholar
-----------	---

POSITIONS	Postdoctoral Scholar , Tufts University 2025 – present Graduate Research Assistant , Univ. of Massachusetts Amherst 2019 – 2025 DAWN-IRES Graduate Researcher , Cosmic Dawn Center 2022 Undergraduate Research Assistant , Univ. of Connecticut 2016 – 2019 SURF Intern , Dark Cosmology Center 2017
-----------	---

ROLES	NIRCam Catalog Lead (MINERVA): <i>Created the high-quality, publicly-available NIRCam photometric catalogs for the MINERVA collaboration, leveraging over 20 photometric filters (including medium-band photometry) to achieve the best photometric redshift performance to date.</i> The Relic Co-Principal Investigator: <i>Reduced some of the deepest NIRSpec/IFU PRISM data to date, discovering young, He-enhanced globular clusters at redshift 2.5.</i> Point-spread Function Lead (UNCOVER): <i>Developed techniques to generate empirical point-spread functions and homogenization kernels for JWST NIRCam imaging, a crucial step in the photometric pipeline for UNCOVER.</i>
-------	--

SKILLS	<i>Data Handling:</i> Photometry: aperture photometry (SourceExtractor/SEP, Aperpy, Photutils), PSF matching (empirical PSF generation, Grizli, shapelets, PyPHER) Stellar Population Modeling: SED fitting (Prospector, Eazy), FSPS Morphology: profile fitting (GALFIT, statmorph, pysersic) <i>Code:</i> Python: numpy, matplotlib, scipy, astropy (expert)
--------	---

Not listed: Twenty publications in *The Astrophysical Journal*, seven publications in *The Astrophysical Journal Letters*, two publications in *The Astrophysical Journal Supplement Series*, two publications in *The Monthly Notices of the Royal Astronomical Society*, two publications in *Nature*, one publication in *Astronomy and Astrophysics*, and eight submitted publications.

In total: Five first author publications, 57 total publications.

SUCCESSFUL
GRANTS &
PROPOSALS

JWST Cycle 5 Small Program GO-11883

Co-I; 33.0 hours

Opening a New Window on Globular Cluster Formation with Strong Lensing at $z = 2$

JWST Cycle 5 Medium Program GO-11373

Co-I; 77.4 hours

Opening the 5.6 – 18 μ m Window on the Community Deep Public Frontier Field

JWST Cycle 4 Very Small Program GO-8607

Co-I; 19.8 hours

Studying cosmic noon at 200 parsec scales: resolved spectroscopy of a magnified dusty quiescent galaxy

HST Cycle 32 Medium Program GO-17730

Co-I; 72 orbits

Fulfilling the UV Legacy of the Hubble and Webb Deep Public Frontier Field

JWST Cycle 3 Small Program GO-6405

PI; 20.3 hours

Clumpy Relics: The First Spectroscopic Confirmation of Globular Clusters at $z \sim 3$

SELECT
PRESENTATIONS
AND TALKS

MIT/Kavli Institute Monday Afternoon Talk, Cambridge, MA, USA

Invited talk — March, 2026

“The Structure and Formation Histories of Low-Mass Quiescent Galaxies in Overdense Environments”

Santa Cruz Galaxy Workshop, Santa Cruz, CA, USA

Poster presentation — August, 2025

“The Structure and Formation Histories of Low-Mass Quiescent Galaxies in Abell 2744”

University of California Riverside Aurora Webinar, Virtual

Invited talk — March, 2025

“The Structure and Formation Histories of Low-Mass Quiescent Galaxies in Abell 2744”

Tufts Astronomy Seminar, Medford, MA, USA

Invited talk — February, 2025

“The Structure and Formation Histories of Low-Mass Quiescent Galaxies in Abell 2744”

American Astronomical Society 245th Meeting, Nat’l Harbor, MD, USA

Contributed talk — January, 2025

“The Structure and Formation Histories of Low-Mass Quiescent Galaxies in Abell 2744”

Tinsley Workshop, New Haven, CT, USA

Contributed talk — October, 2024

“The JWST Perspective of Low-Mass Quenching”

Extreme Galaxies Conference, Reykjavik, IS

Poster presentation — June, 2024

“Two Distinct Classes of Quiescent Galaxies Revealed by Sizes and Morphologies at Cosmic Noon in JWST PRIMER and UNCOVER”

American Astronomical Society 243rd Meeting, New Orleans, LA, USA

Contributed talk — January, 2024

“Low-Mass Quiescent Galaxy Sizes in the JWST PRIMER and UNCOVER Treasury Programs”

JWST First Light Conference, Cambridge, MA, USA

Poster presentation — June, 2023

“Low Masses, Small Sizes, More Excitement: Preliminary Low-Mass Quiescent Galaxy Sizes from JWST PRIMER and UNCOVER”

American Astronomical Society 241st Meeting, Seattle, WA, USA

Contributed talk — January, 2023

“Measuring Star-Formation Histories at $z \sim 2$ with a Semi-Resolved Approach”

COSMOS Collaboration Meeting, Paris, FR

Contributed talk — July, 2022

“Galaxy Structural Properties and Star-Formation Histories with 3D-DASH”

- TEACHING
- Lecturer, UMass Amherst*
- UMass Precollege Summer Astronomy Course** 2020–2024
Summer course for high school students with lab and lecture components
-
- Graduate Researcher, Cosmic Dawn Center*
- DAWN-IRES Career Skills Seminars** Summer 2022
Undergraduate seminars
-
- Teaching Assistant, UMass Amherst*
- Writing About Astronomy** Spring 2021
Undergraduate course for astronomy majors
- The Solar System** Fall 2020 – Spring 2021
Undergraduate course with lab component for non-majors
-
- Student Supervision*
- Graduate:** *UMass Amherst* — Sarah Bodansky; *Tufts* — Richard Pan, Veronica Pratt, Luke Robbins
- Undergraduate:** *UMass Amherst* — Ayesha Abdullah, Robert Crager, Leonardo Drake, Lilian Wright; *Cosmic Dawn Center* — Hanga Andras-Letanovszky, Lauren Elicker, Rebeca Reyes Carrión, Eric Rumsfeld, Allan Vanzandt
- High School:** Avery Minter
-

- OUTREACH
- Astronomy on Tap – Western Mass:** Fall 2024 - Spring 2025
Co-led the creation of the Western Massachusetts chapter of Astronomy on Tap, including finding a venue, organizing shows, managing the group’s social media, hosting, and presenting at shows.

Eureka! Workshop:

Summer 2024 & 2025

Assisted with Girls Inc of the Valley's Eureka! workshop: a 2-day astronomy workshop at UMass where students learned about astronomical imaging and worked with real data to make color images that were heat pressed on to tote bags.

SPARK Camp:

Summer 2018 & 2019

Held stargazing sessions and promoted STEM careers for SPARK, a youth camp for girls interested in STEM majors.

HONORS & AWARDS	First MINERVA Paper, MINERVA Collaboration	2026
	MA Space Grant Grad. Research Fellowship, NASA/MASGC	2021
	Best Undergraduate Poster, Univ. of Connecticut	2018
	Babbidge Scholar, Univ. of Connecticut	2016, 2018
	CT Space Grant Undergrad. Research Fellowship, NASA/CTSGC	2018
	Michael Cantara Undergrad. Research Award, Univ. of Connecticut	2017
	New England Scholar, Univ. of Connecticut	2017
